

I. Name of the app

- A. Something that incorporates quizzing, testing and critical thinking?
 - 1. Right now it implies it only does quizzes
 - 2. Change the assistant's name based on this?
 - a) Chat assistant is currently named Qisra

II. General

- A. More playful, fun color palette better suited for middle schoolers
- B. What is the overall vision for the aesthetic?

III. User Chat

- A. Alter scrolling function of chat container so that only the response box scrolls as the chat becomes longer so that the input box/area "sticks" to the bottom of the chat container at all times
- B. Implement "typing..." indicator while waiting for assistant response
 - 1. Assistant's name should show immediately as well upon user sending message

IV. Admin Portal

- A. Rename to teacher portal
- B. Add instructions for teachers about how to:
 - 1. Modify system message to AI assistant (if needed) and create a new assessment for students

V. Instructions to ChatGPT

- A. Create more precise instructions that narrow the way the AI will respond
 - 1. Ensure AI gives the student the options for answers again if they get the answer wrong (unless it's an open-ended question)
 - 2. Restrict the way the AI model greets the student and begins the exam/quiz
