CritiQuiz App Summary

CritiQuiz is an AI-powered testing service application that helps educators assess students through a critical thinking model. The app utilizes AI to guide students through test questions and prompts them to think critically when they answer incorrectly, offering multiple attempts as set by the instructor. The app shifts the focus from rote memorization to problem-solving. It uses adaptive feedback to foster deeper understanding and promote meaningful learning outcomes.

Traditional testing often focuses on recall, which doesn't foster critical thinking. Our service encourages students to think critically and refine their answers through feedback, promoting skills aligned with modern educational needs. This dynamic approach is intended to improve learning outcomes.

This service is designed for schools to benefit diverse learning environments. It emphasizes experiential learning in an online setting. The app provides many functionalities. Students can refine answers over multiple attempts. Teachers track progress and performance, adjust difficulty levels and question types. Teachers can also gain insights on student performance to guide personalized learning

The app utilizes ChatGTP 4.0, question bank and app configurations to provide personalized guidance to students for deeper engagement.
